

In-Person Training Spring 2024

Basic Municipal Wastewater

This five-day, **in-person** course is designed for those new to the wastewater industry and/or preparing to take basic-level municipal wastewater operator exams. Municipal wastewater treatment concepts from collection through preliminary, primary, and secondary treatment to disinfection and solids handling will be reviewed. Sample tests and math problems will be provided. Attendees must bring a simple calculator, scratch paper, and a pen/pencil to class.

Please note that this course teaches municipal wastewater concepts. It will not cover all topics recommended to prepare for certification exams. We strongly recommend that those preparing to take certification exams also attend related courses including Laboratory and Regulations. For a listing of available courses on these topics, please visit our website at: <https://payments.neiwpc.org/>

Online Registration Required
